Please use the print option from the website for current information

Symbiosis of Art and Glass Technology

This new product allows the transformation of a multitude of artistic and creative impressions. Glass is becoming an individual design element. STADIP ARTE realises your most daring dreams – from brush stroke to photo-quality image, from graphic file to colour-graduations in all shades – the unrestricted use of glass makes it possible.

STADIP ARTE is a Laminated Safety Glass, which uses special technology to render every design concept in transparent, opaque or translucent colour – even within a single sheet. It is possible to use digital data as well as original artwork as reference. The original example is reproduced one hundred percent identical in colour and shape onto the film.

As soon as we receive your data, a sample will be made (1:1 extract), which you can then use for realisation once approved.

STADIP ARTE is a Laminated Safety Glass of 2 x 4 mm Float Planilux Diamant with a 0,76 mm film interlayer. Planilux Diamant is a Low-Iron extra-clear Float glass without the typical green hue.

Technical Information and Characteristics

For use in spandrels, guarding areas, balustrades and point-fixed glazing we recommend the use of STADIP ARTE comprising 2 x Tempered Safety Glass of Planilux Diamant.

COLOURS

On the one hand, colour definition can be made to RAL, Pantone, NCS, . . . On the other hand unrestricted possibilities are offered. You can choose the blue of a particular ocean or the red of a rose which has just been awoken by the sun. You can choose the colour warmer or more opaque - every choice is possible to achieve.

EFFECTS

Fantasy without boundaries – with different effects glass appears in an endless multitude of visions. Here is a small selection: like alabaster in its translucent fragility, with metallic effects, with the structure of rice paper. Your fantastic or even just simple visions can be transformed into reality using STADIP ARTE.

DESIGN DIRECTIVES

Digitally prepared data, originals or photos.

PHOTOS

From outside opaque, from inside sepia to grey transparency or also transparent to translucent colours.

APPLICATION

Everywhere that architecture or design is perceived as an emotional address or if corporate philosophy is to be shown in perfect functionality - STADIP ARTE is the ideal medium for expression.

For Interior and exterior glazing, also frameless for doors, partitions, spandrels, tables, showcases, Facades, entrances and even signage

EDGE TREATMENT

Use in external applications should have fine ground edges.

MAXIMUM PRODUCTION SIZES

1500 x 3000 mm (larger upon request)
