Typical composition and test method

Typical composition – STADIP PROTECT monolithic

The PvB interlayer is the functional substrate

Test method
Ball drop test

Apparatus
Steel ball, 4.1 kg, Ø 100 mm
Each sheet must resist 3 impacts

Resistance class
The drop heights are: Class
P1A = 1.5 m
P2A = 3.0 m
P3A = 6.0 m
P4A = 9.0 m
P5A = 9.0 m (with 9 x ball drop)
